■ How to Save Any Document as PDF for Google Drive

Method A: Browser PDF Export (1-Click)

- Click any of the Printable A4 / PDF Export Links in the table above.
- Click the ■ ■ Save as A4 PDF button at the top of the page (or press Ctrl + P / Cmd + P).

3. Set Destination to Save as PDF and click Save.
4. Upload the generated PDF file directly to your Google Drive.

Method B: Generate All PDFs Locally via Python Script

Run the built-in offline converter script in your project root:

```
python scripts/convert_docs_to_pdf.py
```

This generates printable HTML/PDF files for all 7 documentation files inside the docs_pdf_export/ directory.
